Use Custom Vocabulary

Allows you phrases, names, links, or acronyms.

Private & Secure

Everything stays on your device.

Offline First

Everything happens on your device, no WiFi needed.

Use with any app

Works anywhere you can type or paste text. No need to switch apps.

Demo

Reviews

I have replaced typing emails with dictating them using a client-side hosted version of Whisper.

The app I'm using is called [@superwhisperapp](#).

It runs natively on macOS and integrates with the system clipboard.

I highly recommend it.

Reflect Notes

s/o to [@superwhisperapp](#) 🎉 . easily best \$ I've spent this week

been using Whisper on my iPhone, but needed the same for Mac (sorry, Apple, the dictation model isn't quite there...)

I freed up so much mental bandwidth...

Superwhisper is an exciting new way to transcribe audio using AI saving you pesky administrative work

Francesco (ToolFinder.co)
@FrancescoD_Ales

"As a chiropractor, much of my day is spent writing reports. superwhisper has been amazing at helping me speed up that process. I love that the data never leaves my computer, so I know my data is safe."

Dr. Palmer Piana
@palmerater

superwhisper is a great way to 'just talk' to your mac, it's way better than typing, and makes talking to chatGPT

and other AIs super fun and easy.

Forget typing, just talk
